

RODENTICIDES

Many dead eagles, owls and hawks test positive for rodenticides, from eating poisoned rats.

The following products are a **SAFER** way to control rats/mice without causing **SECONDARY** poisoning to birds and pets.

Tom Murphy Photography

FASTRAC

RATX

TERAD3

ASSAULT

PEPPERMINT SPRAY

GOODNATURE RAT TRAP

Rodenticides **MOST TOXIC** to birds/pets include one or more of the following ingredients:

BROMODIALONE

BRODIFACOUM

DIFETHIALONE

DIFENACOUM
